(54) CHAIR

COPYRIGHT: (C)1999,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To improve convenience of a chair used in an office.

SOLUTION: A female screw hole 17 is formed on a plate 13 of a supporting structure body 11 of a back seat 7. A bracket assembling opening 19 is provided at a cover 14 of the supporting structure body 11 of the back seat 7. A bracket 20 supporting a hanger 26 is inserted into the bracket assembling opening 19, and detachably mounted by a male screw member 18 screwed into the female screw. The hanger 26 is mounted on the bracket 20 and it is possible to prevent a collar from crushing and a skirt from trailing and to hang on a jacket thereby. When a container is mounted on the bracket 20, a small good such as a cell phone can be put on a chair 1. After the bracket 20 is taken out of the bracket assembling opening 19, the bracket assembling opening 19 can be covered with a cap to keep fine appearance.
